SUMMARY: A proactive fleet risk management programme reduces the risk of incidents considerably but occasionally accidents will still occur. If you have the correct training programme in place to deal with these events this can help drivers recover and learn from what has happened and the same can be said of the business. We will help you learn and deal with the immediate aftermath of an accident.

POST-ACCIDENT DRIVER TRAINING

Post-accident training helps drivers regain their confidence and avoid similar incidents in the future. Any drivers involved in an incident needs to take the steps to return to driving for work. The course will help them deal with the trauma of being involved in an incident, restoring confidence and building skills.

HOW POST-ACCIDENT CAN HELP

- Reduce the chance of future incidents
- Minimise future claim costs
- Help your employees overcome the trauma of incidents
- Build awareness skills around incidents

COURSE OUTLINE

- Recognising the role of human factors and driver behaviour in managing occupational road risk
- Understanding the importance of planning to improve safety
- Demonstrating safe driving behaviour in all driving environments
- Understanding how conducting pre-journey checks can reduce occupational road risk
- Introduction to the System of Car/Van Control
- Developing awareness and attention
- Improving a drivers vehicle control
- Laws of the road
- Developing a positive driving mindset
- The psychology of driving

Awarding Body: DVSA (Driver & Vehicle Standard Agency).

Course Duration: 1 Candidate per trainer over 4 Hours.
