SUMMARY: Whether you have a small company or large business the cost of running the fleet is one of the biggest overheads you face. Helping your employees to drive more efficiently is a quick and easy way to reduce business transport costs and carbon emissions.

CTA is an approved Fuel-Efficient training provider. Our training is conducted on a one-to-one basis. Among all the benefits listed below, your company drivers could improve their MPG up to by 15%.

COURSE OUTLINE

How Will Fuel Efficient-Driving Benefit Your Organisation?

Fuel Efficient-driving is the use of driving methods and skills that produce economic and environmental benefits:

- Reduced fuel consumption and carbon emissions.
- Increased MPG by up to 15 per cent.
- Reduced risk of vehicle incidents.
- Lower risk of vehicle wear and tear.

The driver is coached in the three core elements of Fuel-Good driving plus any other techniques discussed in the first feedback session.

- Greater anticipation.
- Use of gears particularly when changing up at low revs during acceleration.
- Use of a 'trailing throttle' i.e., lifting off the accelerator early but remaining in gear when decelerating.

Trip-average fuel consumption (MPG) and trip-average speed (MPH) are measured during the first and second lap of the route as they form part of discussions in the feedback sessions. These discussions are based on the MPG and MPH figures for drivers and the reason why there is improvement in MPG due to fuel good driving training.

Awarding Body: DVSA (Driver & Vehicle Standard Agency).

Course Duration: 1 Candidate per trainer over 1 Hour.

Costings: Training course costs per candidate £50.00+Vat.
